Rusted Steel

## Standard Collection

1180mm(w) x 2400(h)

### Decorative Screens

Create privacy or add a modern feature to your indoor or outdoor areas

## Standard Collection

Add your own artistic flair to any indoor or outdoor area with Ultrascreens decorative screens. Perfect for internal or external use, these decorative screens add sophistication and style to any area.

Screening can shape and remodel an entire space, providing your home, office or garden with an artistic feature, or even an inexpensive modification to the entire area through the use of separation screens. Ultrascreens can also bring an outdoor area to life, with the rustic steel or colourful aluminium composite screens complimenting any natural outdoor setting.

Decorative and privacy screens boast various uses and effect on spaces. Whilst being visually appealing in any setting, screening also offers more practical benefits including view obstruction for increased privacy, floor plan modifications and even noise reduction.

## Technical Specifications

- All standard screens are 1180mmx2400mm
- Screens can be either 2mm or 3mm Rusted Steel or coloured 3mm gloss Aluminium Composite Panel
- Holes for fixings can be included in the design if you specify the quantity, size and location of each when ordering

### Rusted Steel

The vibrant colour and unique texture of rusted steel provides an eye-catching compliment or focal feature for any space, while the weather resistant steel allows flexibility in any outdoor project. Once rusted, the steel is designed to be protected by its own outer layer, protecting the rest of the panelling from any weather conditions.

### Aluminium Composite

Aluminium creates great flexibility within your screen design as a huge range of designs and colours are available. The material is extremely lightweight making transportation and installation a breeze. This also allows for a greater creative license in design as aluminium panels will be suitable for installation on almost any surface.
